

Dassault Systèmes SolidWorks

Highlights

- **SolidWorks Authorized Reseller**
- **Consultation and support to take you smoothly through the entire implementation of SolidWorks products.**
- **SolidWorks certified resources.**
- **Customized corporate training programs. ***

EZAR Engineering and SolidWorks have teamed up to deliver the benefits of IT in hardcore manufacturing environment. EZAR has been using these technologies for last two decades and has shortened product development cycle, cut cost and improved quality of products.

Our consultants, designers, engineers, trainers and support team have experience to implement and deploy Computer Integrated Manufacturing in true sense.

SolidWorks Solutions

Dassault Systèmes SolidWorks Corp. offers complete 3D software tools that let you create, simulate, publish, and manage your data. SolidWorks products are easy to learn and use and work together to help you

Design products better, faster, and more cost-effectively. SolidWorks focuses on ease-of-use allows more engineers, designers and other technology professionals than ever before to take advantage of 3D in bringing their designs to life.

SolidWorks product portfolio includes

- ✓ **SolidWorks CAD**
- ✓ **SolidWorks Simulation**
- ✓ **SolidWorks Enterprise PDM**
- ✓ **3DVIA Composer**
- ✓ **SolidWorks Sustainability.**

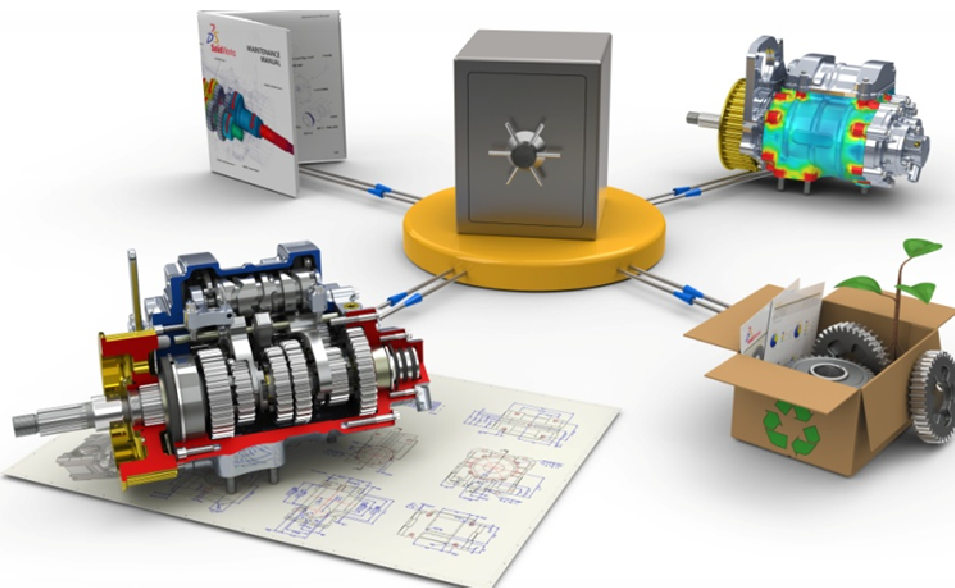

Services

EZAR Engineering powers the CIM with **Dassault Systèmes SolidWorks** and our own consulting services that include:

- Technology Selection
- Hardware Selection
- Installation and configuration
- Customization to ensure SolidWorks supports your unique business requirements.
- Performance optimization by setting up best practices of Software usage as per your application.
- Engineering and design services from EZAR Engineering experts at your location or at our state-of-the-art facility.

SolidWorks Premium

Go from concept to virtual prototype faster than you ever thought possible with the desired quality using a single easy to use application. SolidWorks Premium is so complete; you can progress from a product concept to a highly accurate virtual prototype without employing any other software.

Qualified, Experienced, Experts

"Transforming your crucial
Challenges into success.
That's what motivates us."

Support

Our support system is the channel for our clients to access the abundant knowledge that resides with us. We promote a virtual environment where we are available at your service 24X7.

You can choose the option of using an available solution or request for a tailored one. You can add a lot to your knowledge by being a part of periodic events organized by us either online or live. Our support system is the best way to realize the benefits of being with us.

Technical support for SolidWorks is provided only by the certified professional through a system which aligns you to the Technical Account Manager (TAM) assigned to you exclusively. This reduces the time that is wasted in explaining the problem each time to different support executive.

Support is provided through this system via telephone, email, video conferencing or by sharing desktops. Customer experiences as if the support is given from his next desk.

Of course we are better at each component but putting them all together we become inimitable. That makes us better- makes us unique.

Why EZAR

- ✓ We are one amongst you.
- ✓ We bring the best blend of IT and Manufacturing.
- ✓ We use what we sell.
- ✓ We have the integrated Solutions-Services-Support.
- ✓ We are proven.

Benefits

Lower costs, faster time to market

At EZAR, we focus on helping you design better products, smarter – cheaper - faster. Our 3D CAD helps your staff be more productive, our PDM software ensures that you avoid costly errors, and our Simulation software helps speed up the prototyping process. But don't take our word for it—in a 2006 MIT survey of SolidWorks users, 54% of respondents reported reduced time-to-market, with an average reduction of 20%, and an average materials savings of up to 18%.

Improved collaboration

With SolidWorks, you and your staff can share designs with one another and external partners, opening the door to new ideas, better products, and expanded opportunities.

See increased productivity, sooner

SolidWorks is easy to learn, so your company will start seeing increases in productivity sooner than later. Companies adopting SolidWorks saw productivity gains within just 2.5 months on average.
