

# DriveWorksXpress

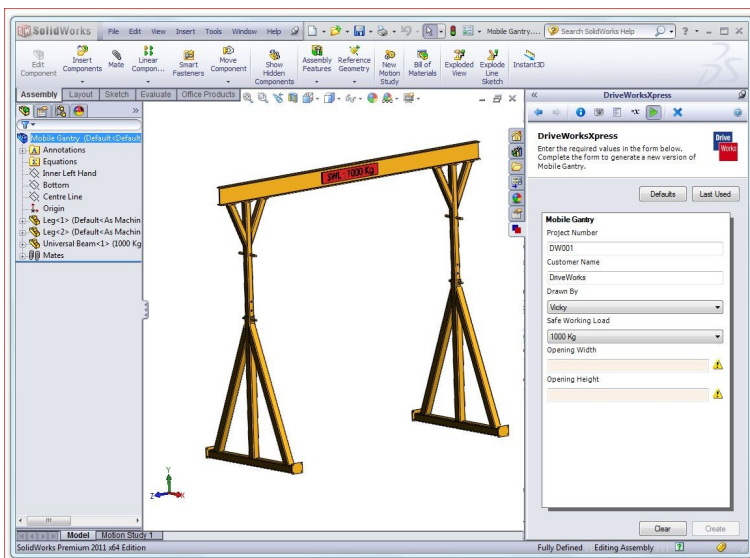

DriveWorksXpress – Design Automation for SolidWorks Engineers

Included as standard in EVERY seat of SolidWorks

DriveWorksXpress - The Easy to Use Design Automation Choice for SolidWorks

**DriveWorksXpress** is the **easy to use** design automation tool inside SolidWorks that allows you to quickly and accurately create multiple variations of your SolidWorks parts, assemblies and drawings.

**Automation with DriveWorksXpress is easy. SET UP and then RUN over and over again**

### SET UP

1. Use your **SolidWorks** master assembly as the starting point to create customer specific variations
2. Capture parameters and assign rules in **DriveWorksXpress** to determine new outputs
3. Create a form in **DriveWorksXpress** so you can enter the new requirements

### RUN

**Run DriveWorksXpress** again and again to produce new sets of parts, assemblies and drawings quickly and accurately

**NEW variations generated quickly and easily Based on YOUR rules**

### Key Benefits:

- Capture and re-use design knowledge
- Incorporate design rules to minimize errors and the cost of manual mistakes
- Automate repetitive tasks to dramatically reduce design time when specifying new variants
- Liberate design engineers from repetitive tasks to concentrate on new and special designs

**DriveWorksXpress projects can be up-scaled to DriveWorks Solo and Pro**

# Automate with DriveWorksXpress

DriveWorksXpress – Design Automation for SolidWorks Engineers

Included as standard in EVERY seat of SolidWorks

DriveWorksXpress - The Easy to Use Design Automation Choice for SolidWorks

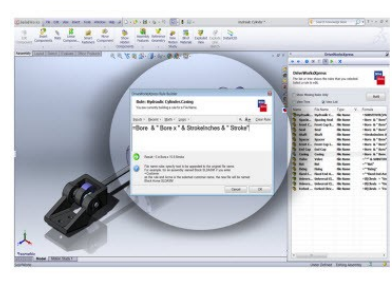

**DriveWorksXpress** is the **easy to use** design automation tool inside SolidWorks that allows you to quickly and accurately create multiple variations of your SolidWorks parts, assemblies and drawings.

## Set Up

*Capture dimensions & features*

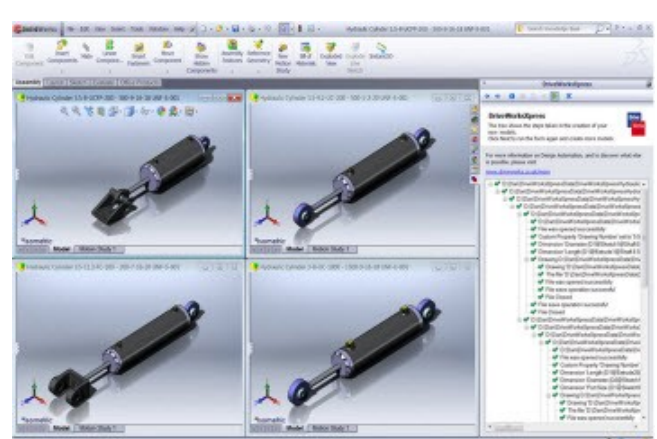

*Create your form for specifying*

*Add & build your rules*

**Run** your project again and again and again ....

*to generate new sets of parts, assemblies and drawings quickly and accurately*
